PROFESSIONAL SUMMARY

Motivated Bachelor of Science Honours in Computer Science student at the National University of Science and Technology (NUST), with hands-on experience in IT support, networking, system configuration, and software development. Proficient in troubleshooting hardware and software issues, maintaining ICT infrastructure, and documenting technical processes. Seeking an ICT industrial attachment at SMEDCO to contribute practical technical skills while gaining professional experience in a dynamic enterprise environment.

TECHNICAL SKILLS

IT Support & Hardware: PC assembly & troubleshooting, hardware diagnostics, peripheral configuration, system maintenance

Networking: IP Addressing & Subnetting, TCP/IP, Router & Server Configuration, MQTT Protocol, Client-Server Architecture

Software & Development: HTML, CSS, JavaScript, MySQL

Productivity Tools: Microsoft Office (Word, Excel, PowerPoint), Git, VS Code, Packet Tracer, Lucidchart

Systems & Security: Data backup procedures, system security awareness, ICT documentation

EXPERIENCE

Network Engineer (Academic Project) | NUST — Group IoT Project(SmartTag)

February 2026 – March 2026

- Designed and implemented device-to-cloud communication flow for an IoT telemetry system using MQTT protocol
- Defined network architecture, IP addressing scheme, and failover strategy for the system
- Configured and tested client-server communication between IoT devices and cloud endpoints
- Diagnosed and resolved connectivity issues during system integration and testing phases
- Maintained accurate technical documentation including network diagrams and design review reports
- Collaborated with a cross-functional team on system upgrades and deployment

Full-Stack Developer — Student Performance Tracker | Personal Project 2026

- Built a full-stack web app (React + Tailwind, Python FastAPI, PostgreSQL/Supabase) for NUST students to track marks and monitor degree classifications in real time
- Integrated AI-powered results extraction via the Claude API, enabling automatic mark imports from uploaded screenshots
- Sole developer — managed end-to-end system architecture, database schema, backend API routes, and frontend UI

IT Assistant (Voluntary) | Self / Community

2021 – Present

- Provided firstline hardware and software support to family and community members
- Performed PC troubleshooting, software installation, and system configuration
- Assisted with data backup, antivirus management, and basic network setup

EDUCATION

National University of Science and Technology (NUST)

BSc Honours in Computer Science September 2024 – Expected 2028 | Bulawayo

Thekwane High School — Advanced Level

A-Level Certificate May 2022 – November 2023 | Plumtree

- Pure Mathematics

- Technical Graphics & Design
- Computer Science

Thekwane High School — Ordinary Level

O-Level Certificate — 10 subjects including Mathematics, Science & English *January 2018 – November 2021* | Plumtree

LANGUAGES

Ndebele — Fluent **English** — Fluent **Shona** — Intermediate
